

Hi there! My name is Luiza Silveira and I am a Licensed Clinical Social Worker. I have worked with children and families for about 15 years. I started my journey in working with children as a Teacher in Special Education where I worked with children primarily diagnosed with Autism. After attaining my Master of Social Work Degree I worked with a couple ABA organizations as a Supervisor and Behavior Consultant where I focused on developing plans for behavioral management in the home and school environments for children and adolescents ages 4-18.

After working with the Autism population for about 8 years I shifted my focus to providing psychotherapy to children and families. For the past 5 years I have been providing psychoeducation and psychotherapy to children, families, adults, and couples referred by the court system as well as in private sectors. My specialty is children and families with an emphasis on parenting, behavior management and children with special needs.
